

## **I-INCE Workshop for Young Professionals at Inter-Noise 2011**

### **Background:**

I-INCE held a workshop for Young Professionals at INTER-NOISE 2010 in Lisbon, Portugal on 2010 June 15. The workshop was organized by Professor Raj Singh, I-INCE Vice President of Technical Activities. The purpose of the inaugural workshop was to mentor young noise control engineers, discuss some research problems at the cutting edge of technology and provide an informal forum for networking between senior and junior professionals. Twelve grants were awarded during the workshop to Young Professionals early in their careers. These grants included conference registration, with the remainder of the fee grant presented to the winners at the conference to partially offset travel expenses. The workshop concluded with lunch and informal exchanges between attendees. Plans are underway to hold such workshops at INTER-NOISE 2011 and 2012. More details on the workshop can be found on the I-INCE site: <http://www.i-ince.org/>.

### **Young Professionals Workshop Date and Time:**

- To be announced (about 3 months in advance)

### **Audience:**

- Young Professionals (by invitation only)
- All I-INCE 'young scientist' applicants will be invited plus a few more who would be attending Inter-Noise 2011
- All participants must be formally registered for Inter-Noise 2011 and then for the workshop (invitations to be issued about 3 months in advance)

### **Topics:**

- Interesting noise control case studies - to be presented by noise control experts
- Informal discussions between young professionals and I-INCE leaders and senior noise control engineers
- Detailed program will be posted on the web site about 3 months in advance
